

# SLOPE: TWO POINT FORMULA

NAME: \_\_\_\_\_

DATE: \_\_\_\_\_

Use the two-point formula method to find the slope of a line passing through the given points.

1) (5,6) (1,-2)      Slope = \_\_\_\_\_      6) (3,11) (6, -10)      Slope = \_\_\_\_\_

2) (1, 7) (1, -2)      Slope = \_\_\_\_\_      7) (3, 9) (1, 8)      Slope = \_\_\_\_\_

3) (-2, 3) (8, -12)      Slope = \_\_\_\_\_      8) (-7, 4) (1, -4)      Slope = \_\_\_\_\_

4) (-19, 12) (-9, 1)      Slope = \_\_\_\_\_      9) (19, -2) (-11, 10)      Slope = \_\_\_\_\_

5) (-7, 4) (9, -4)      Slope = \_\_\_\_\_      10) (19, 3) (20, 3)      Slope = \_\_\_\_\_
